PROFESSIONAL SUMMARY

Senior Mobile Engineer with 5+ years of hands-on experience building and maintaining production React Native applications for iOS and Android, serving 1M+ users. Strong background in mobile architecture, performance optimization, and release workflows. Own features end to end-from implementation and testing to deployment and post-release monitoring-while mentoring the team.

SKILLS

Mobile Development

React Native (CLI & Expo), Expo SDK, EAS Build & Submit, OTA Updates (AppCenter CodePush), TypeScript, JavaScript (ES6+)

UI & Design Systems

Modern UI Systems, Reusable Component Libraries, NativeWind (Tailwind-style styling), Pixel-Perfect UI, Dark Mode & Theming, Figma-to-Code

IDE Tools

Xcode, Android Studio, Visual Studio, Figma, Invision, Adobe XD

Databases

MySQL, MongoDB, SQLite

Soft Skills

Time Management | Problem Solving | Leadership | Communication

State Management

Redux Toolkit, Redux Thunk, Context API, Zustand

Performance Optimization

App Startup Time Optimization, Bundle Optimization, FlatList & FlashList Optimization, Memoization, Image Caching, Memory Management, Frame Rate Stability

Version Control Tools

Git, Bitbucket, App Center

Extras

Offline App Support, Geolocation, Deep Linking, CI/CD Pipelines, Push Notifications, TestFlight, Google Play Console, Sentry (Error Monitoring), and Analytics Event Tracking

PROFESSIONAL EXPERIENCE

Sr Software Engineer

Khedmah Delivery (Spring Trading and Technologies LLC)

01/2025 – Present
Muscat, Oman

- Contributing to production React Native applications used across customer, driver, and vendor platforms.
- Working closely with backend, product, and QA teams during development and testing phases.

Sr Software Engineer

The Ninehertz

12/2023 – 01/2025
Jaipur, Rajasthan

- Contributed to several **international service-based apps** in fitness, lifestyle, and pet care domains, focusing on responsive UI, performance, and offline support.
- Learned effective client communication, sprint planning, and delivering high-quality apps within tight timelines and changing requirements.

Mobile App Developer

Code Brew Labs

01/2021 – 11/2023
Chandigarh, India

- Started as an intern and progressed to a senior developer role, taking responsibility for maintaining and supporting multiple mobile services. Worked on a multi-service mobile platform powering e-commerce, food, and delivery applications.
- Improved skills in modular architecture, build optimization, and release automation, ensuring stable and efficient multi-app deployments.
- Recognized with the **Best Performer Award** for outstanding contribution and leadership during the last 6 months of tenure.

PROJECTS

Khedmah Delivery [↗](#)

- Khedmah Delivery lets users order food, groceries, and D2D services, with live tracking and smart filters for restaurants, ratings, and cuisines.
- Worked as a **React Native Developer**, handling **UI development, API integration**, and real-time order tracking.
- Implemented OTA updates using AppCenter CodePush, enabling rapid hot fix delivery without app store resubmissions.
- Integrated **loyalty rewards, secure payment options** and notifications for order updates and customer support.
- Developed and integrated **Driver** [↗](#) and **Vendor apps** to manage deliveries and partner services efficiently.

SnapHatch - Fly Fishing Guide [↗](#)

- SnapHatch helps anglers identify insects, choose the right flies, and track catches — even without internet.
- Worked as a React Native Developer, focusing on **offline** database setup and queries using **SQLite**.
- Built features like **insect identification, digital fly box**, and **catch log** to help users track fishing activity.
- Integrated **maps** to show hatch reports, catch locations, and water flow details.
- Helped in API development and made sure data stays in sync when users go online.

DogPack: Dog Parks & Pet Care [↗](#)

- DogPack is a mobile app that helps users find dog-friendly parks, cafés, hotels, and book trusted pet care services while connecting with other dog owners.
- Integrated **interactive maps** to show nearby parks, walking trails, and pet-friendly places.
- Built parts of the **feed, chat, and lost dog alert** features to make the app more community-driven.
- Focused on improving performance and usability, helping the app reach **over 1 million downloads**.

Groovio [↗](#)

- Groovio helps users book classes, track fitness progress, and connect with their community.
- Handled **responsive UI design, API integration**, and core app features.

Royo Orders 2.0

- Royo Orders 2.0 is a React Native platform that powers over **300 sub-apps** for services like **E-commerce, Food & Grocery delivery, Taxi Booking, Laundry**, and **Home Services**, including separate **Driver** and **Vendor** apps.
- Worked as a React Native Developer, helping build and maintain multiple apps from a **single shared codebase**.
- Integrated all sub-apps using **Android Flavors** and **iOS Targets** to manage unique branding and configurations.
- Contributed to shared modules like **authentication, orders, carts, and notifications** for consistent user experience across all apps.
- Some published sub-apps include **Towfinder** [↗](#), **Towfinder Driver**, [↗](#) and **Codiner**.

EDUCATION

Bachelor of Technology, Computer Science Engineering

Suresh Gyan Vihar University - 7.36 SGPA

07/2018 – 03/2021

Jaipur, Rajasthan

CERTIFICATES

- Core Java [↗](#)
- The Fundamentals of Digital Marketing [↗](#)
- Google Cloud Platform Fundamentals [↗](#)

LANGUAGES

English, Hindi

HOBBIES

Cricket | Badminton | Table Tennis | Gymming | Listening to Music
